Client Results That Speak

“Over the past three years, VBS built a Global Delivery Infrastructure exclusively for us - covering every discipline we deliver across our projects. What started as a capacity solution has now become a core part of our operations. RFPs we once declined due to bandwidth constraints, we now confidently pursue and win. As a result, our pipeline has grown by 34%, while our dependency on hiring has reduced by 90%.

Ric Chan

Director - VDC Sunway Construction
Malaysia

“We were done with outsourcing after working with three offshore teams that consistently fell short of expectations. Frustrated with the lack of quality and alignment, we tried VBS on a 30-day pilot. Two years later, that decision transformed how we operate - a dedicated team of five now works seamlessly alongside us, fully integrated into our workflows and functioning as an extension of our in-house team.

Alec Whitten

Principal, Whitten Architects
California

Three Ways to Engage

1

Start

For early adopters
One-off

2

Scale

For growing partners
Dedicated Teams

3

Transform

For strategic partners
