INPUT DATA

CAD Data

OUTPUT DATA

Architecture Model

PROJECT SUMMARY

The task is to create the 3D BIM Model of Architecture behind the purpose of CAD to BIM modeling was to get UpToDate Architectural information.

CHALLENGES & SOLUTIONS

The only challenge was to understand and transform the 2D drawing into 3D as the drawings were made without following any standard.

Our CAD team refined the 2D drawings as per UK standards and then converted it into BIM Model.

CLIENT'S RATINGS

TESTIMONIAL

Good hand by Virtual Building Studio team. Our Owner is impressed after seeing this 3D model.
